

## Multiplication de Fractions (J) Answers

Évaluez et simplifiez chaque expression.

$$\begin{aligned} 1. \quad & \frac{1}{4} \times \frac{2}{3} \times \frac{3}{2} \\ & = \frac{1}{4} \end{aligned}$$

$$\begin{aligned} 5. \quad & \frac{9}{4} \times \frac{5}{12} \times \frac{1}{5} \\ & = \frac{3}{16} \end{aligned}$$

$$\begin{aligned} 9. \quad & \frac{5}{6} \times \frac{1}{3} \times \frac{4}{3} \\ & = \frac{10}{27} \end{aligned}$$

$$\begin{aligned} 2. \quad & \frac{3}{2} \times \frac{1}{6} \times \frac{22}{9} \\ & = \frac{11}{18} \end{aligned}$$

$$\begin{aligned} 6. \quad & \frac{1}{5} \times \frac{5}{2} \times \frac{3}{5} \\ & = \frac{3}{10} \end{aligned}$$

$$\begin{aligned} 10. \quad & \frac{7}{5} \times \frac{3}{2} \times \frac{1}{3} \\ & = \frac{7}{10} \end{aligned}$$

$$\begin{aligned} 3. \quad & \frac{3}{2} \times \frac{5}{12} \times \frac{5}{4} \\ & = \frac{25}{32} \end{aligned}$$

$$\begin{aligned} 7. \quad & \frac{2}{3} \times \frac{9}{11} \times \frac{3}{4} \\ & = \frac{9}{22} \end{aligned}$$

$$\begin{aligned} 11. \quad & \frac{5}{9} \times \frac{6}{11} \times \frac{5}{2} \\ & = \frac{25}{33} \end{aligned}$$

$$\begin{aligned} 4. \quad & \frac{2}{5} \times \frac{7}{6} \times \frac{3}{5} \\ & = \frac{7}{25} \end{aligned}$$

$$\begin{aligned} 8. \quad & \frac{1}{4} \times \frac{1}{3} \times \frac{9}{4} \\ & = \frac{3}{16} \end{aligned}$$

$$\begin{aligned} 12. \quad & \frac{13}{6} \times \frac{1}{2} \times \frac{4}{5} \\ & = \frac{13}{15} \end{aligned}$$
